ОТ АВТОРА

Дорогие ребята, уважаемые учителя и родители!

Автор данного пособия занимается подготовкой учащихся к централизованному тестированию с момента возникновения ЦТ, поэтому знает все «подводные камни» и трудности, с которыми сталкиваются абитуриенты на этом экзамене (сайт автора — www.englishteacher.by).

Данное пособие поможет Вам повторить, закрепить, довести до автоматизма и проверить языковые знания и умения на начальном уровне изучения английского языка, подготовит к успешной сдаче тестов любой сложности в будущем, в том числе, олимпиад и ЦТ.

Пособие содержит тренировочные задания, проверяющие языковые навыки и умения, и предназначено для учащихся 6-х классов, учителей английского языка, для родителей, которые занимаются со своими детьми самостоятельно, тех, кто изучает язык и готовится к ЦТ, а также делает первые шаги в изучении английского языка.

Тестовые задания обращают внимание на основные ошибки, которые делают учащиеся при изучении английского языка, нюансы, помогают научиться работать с текстом, расширяют словарный запас и кругозор.

Каждый тест содержит задания на все основные грамматические правила, список которых находится на с. 4 данного тренажера. Он поможет учителям проводить промежуточный и итоговый контроль знаний, а родителям — повторить с ребенком пройденный материал во время каникул.

Тесты составлены в соответствии со школьной программой и по своей структуре соответствуют тестам централизованного тестирования.

СПИСОК ГРАММАТИЧЕСКИХ ПРАВИЛ, ВКЛЮЧЕННЫХ В ТЕСТЫ

1. Глагол "to be": am, is, are, was were;
2. The Present Simple;
3. The Present Continuous;

Thomas Edison was one of the greatest inventors of all the time. One of his best-known works was the phonograph. He built it in 1877. It was the first machine to record and play sound. Any inventor of this sound machine could be called great. For Edison, it was a very great deed (*подвиг*). He was partly deaf (*частично глухой*).

When Tom was a teen, he worked on a train. One day he was late for work. He ran for the train. The conductor tried to help the boy. He grabbed Tom by the ears and pulled him up. He was hurt very much. From that point on, he grew more and more deaf.

30. What was Thomas Edison?
A) doctor B) conductor C) traveller D) inventor

31. What was one of his greatest works?
A) telephone B) television C) photograph D) phonograph

32. Why was Edison's invention great?
A) he was deaf B) he was blind C) he was great D) he was late

33. When did Tom grow deaf?
A) in his childhood B) on pension C) he was a teen D) in 1877

34. What did the conductor want to do?
A) hurt B) help C) pull up D) grab

Рис 23 слоны+

People say that an elephant never forgets. That's because an elephant has one of the best memories of any animal or human on earth. The elephant's brain is the largest of any land animal. Elephants play, use tools and have feelings. They even remember other elephants that have died and they can feel sadness for them.

Elephants live for about 70 years. It takes about 22 months for an elephant to be born. Elephants are usually about 265 pounds when they are born! One of the most interesting parts of an elephant is its trunk. An elephant's trunk is strong enough to carry a log. But it is not only for heavy work. An elephant can pick up small objects with its trunk, such as a single leaf. The trunk is even used when an elephant plays. When two elephants greet each other, they twist their trunks together as a greeting.

30. What does an elephant have?
A) sadness B) human C) earth D) memory

31. How many years do elephants live?
A) seven B) seventy C) seventeen D) twenty two

32. How long does it take for elephant to be born?

It was very hard to ride the first bicycles. People had to push their feet against the ground to make their bikes move. These bikes had four wheels (*колеса*). People called them hobby horses.

Later, people began to make bikes with two wheels. The bikes were not like those we can see today. People sat above the front wheel (*переднее колесо*) of the bikes. Bicycle makers tried making big front wheels and small front wheels. They found out that bikes with larger front wheels could move faster. So they started making bikes with large front wheels and small back ones. Some bikes had wheels that were 5 feet tall. Many people were hurt when they fell off these bikes.

Later, people in England made a bike with smaller wheels. The two wheels on the new bike were almost the same size. People sat between the wheels, and their feet pushed two pedals. The two pedals moved a chain that turned the back wheel. The new bike was called a safety bike. People could ride on it without falling 5 feet to the ground. This safe bike became the model for today's bike.

30. How many wheels did hobby horses have?

A) two B) free C) four D) six

31. Where did people sit on later bikes?

A) between the two wheels C) under the front wheel
B) on the ground D) above the front wheel

32. What wheel could bicycle move faster with?

A) large front wheel C) no wheel at all
B) small front wheel D) large back wheel

33. How tall was the front wheel?

A) two feet B) four feet C) five feet D) the same size

34. What kind of bike became a model for today's bike?

A) a hobby horse C) a bike with huge front wheel
B) a safety bike D) a bike with small front wheel

Прочитайте текст. Ответьте на. Выберите один из предложенных вариантов ответа.

The sun is very important for life on earth. In fact, without the sun, life could not exist here. The sun gives earth its heat and light. But what is the sun?

The sun is a star, just like the stars in the night sky. Like all stars, the sun is made of hot gases. It is an average-sized star, too. It only seems so bright because it is closer to us than the other stars we see at night. When we see the sun, there are other stars in the sky also. We can't see these stars during the day because the light from the sun drowns (*монит*) them out. The earth and the other planets travel around the sun while the sun stays in the same place in the solar system.

The sun is 432 thousand miles from one side to the other. The sun is larger than all the planets in the solar system combined. Its surface is 10,000 degrees Fahrenheit (*по Фаренгейту*). At its center, it is 27 million degrees Fahrenheit.

We are far from the sun. In fact, we're 93 million miles away. Imagine how far away all those other tiny stars are from us!

30. What is the sun?

A) a planet B) a comet C) The solar system D) a star

31. What is the sun made from?

A) water B) gases C) solar wind D) light

32. Why do they see the sun so bright?

A) there are other stars in the sky C) the earth travels around the sun

B) it's an average-sized star D) it is closer to the earth

33. What is the sun's size?
 A) 93 million miles C) 432 thousand miles
 B) 27 million degrees D) 10,000 degrees
34. How far is the sun?
 A) 93 million miles C) 432 thousand miles
 B) 27 million degrees D) 10,000 degrees

Запишите слово в той форме, в которой оно должно стоять в предложении.

Прочитайте текст. Ответьте на. Выберите один из предложенных вариантов ответа.

Origami is the Asian art of folding (*сгибать*) paper. The word "origami" comes from the Japanese words "ori" which means "folding", and "kami", which means "paper". The art came to Japan from China in the early seventh century.

People usually folded the paper when they wanted to send letters. Over time, people developed the ways to fold paper in the shape of animals and other objects. Boats and birds were some of the most popular origami shapes. Sometimes boxes were made out of paper and small gifts were placed inside.

Centuries ago, paper was all made by hand. It was very expensive. Origami was an art only for the rich. Over time, paper became easier to get and origami became more popular around the world.

30. Where did origami come from?

A) Australia B) America C) Europe D) Asia

31. When did origami came to Japan?

A) in the late seventh century C) in the early seventh century
B) in the middle seventh century D) in 1917

32. What did people usually fold paper for?

A) boxes B) letters C) birds D) animals

33. What did people place inside the boxes?

A) boats B) small gifts C) letters D) origami

34. How did people make paper centuries ago?

A) by hand B) by the way C) by folding D) developed
